

Family Report: The Memory Problem

Patient Name: _____

My name is: _____ **Relationship:** _____

Instructions: Your answers to the following questions help the doctor put the whole story together. Include details of specific changes and when they began. **The information needs to come from people who have the most accurate information, usually those who have regular contact with the person having the memory problem. Please print.**

1. What were the very first signs that something had changed in the person's memory and behavior? When were changes noticed?

2. Please describe all other signs of problems with memory and behavior (anger, agitation, apathy), along with the approximate time that they developed. (For example: couldn't balance the checkbook starting about three years ago; got lost going to the mall six months ago) Write on the reverse side of the sheet if you need more space.

Initial and Date: _____
